Technical Tour, 7:15 AM to 1:30 PM

1st Stop - In-depth tour of two self-sustaining village mini grids: Kigbe 20kW of PV with 115kW storage powering 145 households 7 businesses and prepaid metering. Then, Yebu with 40kW of PV. Guide: Havenhill Synergy will share system planning, lessons learned, community response and regional scaling. Villages are 2 km apart, 115 km from central Abuja.

2nd Stop - The Katampe 330/132/33kV Transmission Hub. Inaugurated in 2003, this major substation serving Abuja increased its 132kV transmission capacity from 120MVA to 220MVA in 2018. A guided tour will introduce the facility and share details of the exciting "Abuja Feeding Scheme," a US\$170m power transmission project solving the cities transmission problem with an additional five new similar substations over the next two years.

Cultural Tour, 2:00 PM to 6:00 PM

Starting with a spectacular city view from Katampe Hill, the afternoon guided tour will visit the wonderful Nike Art Gallery of native west African artifacts, pass by the Three Arms Zone and conclude with a trip to the top of the Millennium Tower. Time permitting, including a stop at the Shehu Musa Yar'Adua Center. During the tour, our guide will give a history of Nigeria from the early empires through introduction of Christianity by the Portuguese in the 15th century, British invasion of 1851 and becoming an independent republic in 1963.
